ABOUT THE PROJECT

Through a multidisciplinary, transdisciplinary and participatory process, ECF4CLIM develops, tests and validates a European Competence Framework (ECF) for transformational change, which will empower the educational community to take action against climate change and towards sustainable development.

Applying a novel hybrid participatory approach, rooted in participatory action research and citizen science, ECF4CLIM co-designs the ECF in selected schools and universities, by: 1) elaborating an initial ECF, supported by crowdsourcing of ideas and analysis of existing ECFs; 2) establishing the baseline of individual and collective competences, as well as environmental performance indicators; 3) implementing practical, replicable and context adapted technical, behavioural, and organisational interventions that foster the acquisition of competences; 4) evaluating the ability of the interventions to strengthen sustainability competences and environmental performance; and 5) validating the ECF.

The proposed ECF is unique in that it encompasses the interacting STEM (Science, Technology, Engineering, and Mathematics) -related, digital and social competences, and systematically explores individual, organisational and institutional factors that enable or constrain the desired change. The novel hybrid participatory approach provides the broad educational community with: an ECF adaptable to a range of settings; new ways of collaboration between public, private and third-sector bodies; and innovative organisational models of engagement and action for sustainability (Sustainability Competence Teams and Committees).

To encourage learning-by-doing, several novel tools will be co-designed with and made available to citizens, including a digital platform for crowdsourcing, IoT solutions for real-time monitoring of selected parameters, and a digital learning space. Participation of various SMEs in the consortium maximises the broad adoption and applicability of the ECF for the required transformational change towards sustainability.

1 ORGANIZATIONAL STRUCTURE OF THE ECF4CLIM PROJECT

The ECF4CLIM organisational structure is presented in figure 1. The general coordination of ECF4CLIM will rely on CIEMAT who will be responsible for the liaison and reporting to the EC project officer and will be in charge of the administrative and financing issues related to the communication and exchange with the EC. The coordinator will also ensure the coordination among WPs and the progress of the work of all WP according to the work plan and will organize regular steering committee meetings and general assembly meetings. The project Steering Committee (SC) is composed of all the partners of the Project while the General Assembly (GA) is composed by representatives of the project partners and the associated partners. Local teams are formed by the partners and associated partners belonging to a country and will be responsible for the ECF testing and validation activities.

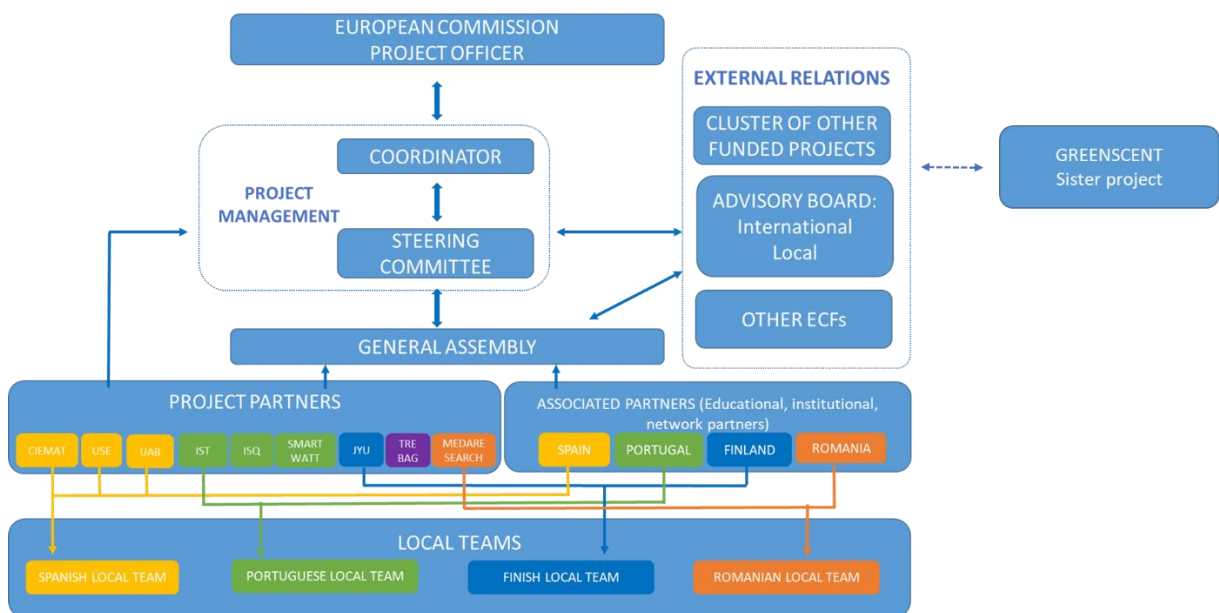

Figure 1. Organisational structure of ECF4CLIM project

Within this management structure a ECF4CLIM Advisory Board is established to provide high-level advice to the ECF4CLIM coordinator, the Steering Committee and the General Assembly on how the ECF4CLIM project can attain its aims and have maximum impact for the public benefit.

Two types of advisory boards are envisaged. One local advisory board composed of all the interested entities in each country, and one international advisory board composed of 2-3 representative entities in each country.

2 FUNCTIONS AND RESPONSIBILITIES OF THE ADVISORY BOARD

The role of the Advisory Body will be to give advice to the General Assembly, to the Steering Committee, and to the project's team on:

- The progress of the ECF4CLIM activities with recommendations for the actions to take;
- Strategic decisions to be taken;
- The dissemination and exploitation of the project results.

The AB role is expected to be performed along the entire project duration (48 months).

The responsibilities of the members belonging to the AB include:

1. Advise the project on the methodological advances and participate in the exploitation plan along the project development.
2. Interact with the project team in order to bring their expertise, advice and recommendations to the project actions (ongoing and forthcoming) and decisions.
3. The local AB members are invited to participate in the local team meetings. These meetings will take place annually and may be face-to-face or via videoconference depending on the circumstances. The AB members have no voting rights in the Steering Committee.
4. The selected AB members to be part of the International AB are invited to participate in the General Assembly meetings that will take place twice per year. The meetings will be one face-to-face (if the sanitary situation allows it) and the other one via videoconference. The AB members have no voting rights in the General Assembly.
5. The Advisory Board will be invited to review some of the most important deliverables of the ECF4CLIM project

The local AB advises, discusses, agrees and provides the recommendations to the ECF4CLIM local team, and the representatives selected to be part of the International AB, transmit these recommendations to the General Assembly.

Meeting invitations mails will be sent to the AB members at least two weeks in advance. The minutes of the local team with the local AB are in the responsibility of each national coordinator from the four countries with demonstration sites (Spain, Portugal, Finland, and Romania). The Coordinator shall write the minutes of International GA meetings and prepare the implementation of the AB's suggestions.

3 RULES OF ENGAGEMENT

Members of the International and Local Advisory Board will not receive an honorarium from the ECF4CLIM consortium.

Reimbursement of travel and accommodation expenses for attending the annual face to face meeting can be provided where requested, and if booked according to ECF4CLIM travel rules.

4 COMPOSITION OF THE ADVISORY BOARD

The AB will be composed with external persons who are key representatives of the stakeholders and potential users of the ECF4CLIM results. The identified stakeholder's categories are:

- National and regional authorities with competences in Education
- National, regional and local authorities with competences in environment
- Institutions with activity in environmental education
- NGOs
- Experts in sustainability and European competence frameworks
- Companies working in sustainability

The composition of the advisory board is conceived as something alive and could change throughout the project duration in such a way that new members could be incorporated as well as some of them cease to be.

Additionally, in order to intensify the coordination and exploitation of synergies between ECF4CLIM and its sister project GreenSCENT, the two projects discussed the possibility to formalize the roles of using the "Advisory board" as the tool supporting the mutual participation of Coordination team members in the respective sister project. One or two "project ambassadors" will be nominated by the GreenSCENT project and these ambassadors will become members of the ECF4CLIM advisory board. ECF4CLIM will also nominate 2 project ambassadors to be integrated in GreenSCENT Project's Advisory Board.

4.1 International AB

The International AB is composed by representatives of the next institutions:

Spain

- Alfonso Gentil. SEPIE. Spanish Unit for the Internationalization of the Education. Ministry of Universities. <http://sepie.es/> (National authority)
- Ana Pérez- Montero/José R. Sánchez Moro. ADEAC. Eco-schools - Environmental and Consumer Education Association <http://www.adeac.es/> (NGO)

Portugal

- Sustainable Campus Network – Portugal.

Letter of Support to ECF4CLIM

I hereby confirm our interest to participate in the Stakeholder Advisory Board (SAB) in relation to your proposal on "A European Competence Framework for a low carbon economy and sustainability through education (ECF4CLIM)".

The proposed SAB will be valuable in ensuring the project is relevant to key stakeholder groups, in reaching out to the wide range of stakeholders in the educational community and in tailoring project materials and results to the different stakeholders.

We therefore welcome the European project ECF4CLIM (A European competence framework for a low carbon economy and sustainability through education) and plan to be engaged in its project activities. We declare our intention to participate in the planned SAB meetings in person or via videoconference and to provide feedback on the different project tasks as relevant.

In case the project is funded, ADEAC [Asociación para la Educación Ambiental y el Consumidor] declares that it will support the project ECF4CLIM by participating in project activities, workshops and/or events.

We look forward to starting a promising cooperation.

Letter of Support to ECF4CLIM

I hereby confirm our interest in participating in the Stakeholder Advisory Board (SAB) in relation to its proposal on "A European Framework of Competencies for a Low Carbon Economy and Sustainability through Education (ECF4CLIM)".

The proposed SAB will be valuable in ensuring that the project is relevant to key stakeholder groups, in reaching the wide range of stakeholders in the educational community, and in tailoring the project materials and results to different stakeholders.

Therefore, we welcome the European project ECF4CLIM (A European framework of competencies for a low carbon economy and sustainability through education) and plan to participate in advising the project. We declare our intention to participate in advising on the planned activities of the SAB and to provide feedback advising on the project as appropriate.

Letter of Support to ECF4CLIM

I hereby confirm our interest in participating in the Stakeholder Advisory Board (SAB) in relation to its proposal on "A European Framework of Competencies for a Low Carbon Economy and Sustainability through Education (ECF4CLIM)".

The proposed SAB will be valuable in ensuring that the project is relevant to key stakeholder groups, in reaching the wide range of stakeholders in the educational community, and in tailoring the project materials and results to different stakeholders.

Therefore, we welcome the European project ECF4CLIM (A European framework of competencies for a low carbon economy and sustainability through education) and plan to participate in advising the project. We declare our intention to participate in advising on the planned activities of the SAB and to provide feedback advising on the project as appropriate.

In case the project is funded, Centro Territorial de Innovación y Formación Madrid Este, Alcalá de Henares, Q2801654A, 28803, MADRID, (Consejería de Educación y Juventud, Comunidad de Madrid), declares that it will support the ECF4CLIM project by participating in advising on the planned activities of the Stakeholder Advisory Board.

We hope to start a promising cooperation.

Place, date: Alcalá de Henares, Madrid, 18/01/2021

Letter of Support to ECF4CLIM

I hereby confirm our interest to participate in the Stakeholder Advisory Board (SAB) in relation to your proposal on "A European Competence Framework for a low carbon economy and sustainability through education (ECF4CLIM)".

The proposed SAB will be valuable in ensuring the project is relevant to key stakeholder groups, in reaching out to the wide range of stakeholders in the educational community and in tailoring project materials and results to the different stakeholders.

We therefore welcome the European project ECF4CLIM (A European competence framework for a low carbon economy and sustainability through education) and plan to be engaged in its project activities. We declare our intention to participate in the planned SAB meetings in person or via videoconference and to provide feedback on the different project tasks as relevant.

In case the project is funded, Fundación Conama declares that it will support the project ECF4CLIM by participating in project activities, workshops and/or events.

We look forward to starting a promising cooperation.
